The authors regret to report that in the originally published version of this article, inadvertent errors occurred in the images presented in Figs. 3C and 5E. During figure compilation, the live/dead cell staining image of Cas9/RNP group and the heart HE staining image of UA group were mistakenly replaced with those from the UA NPs group and Cas9/RNP group, respectively. These figures have now been revised with the correct images derived from the original dataset. This correction does

not affect the findings and conclusions of the paper. The original data of the figures have been provided to the Editorial Office, and the corresponding author or the first author (zbc19921314@163.com) can be contacted for original data access.

The authors apologize for any inconvenience caused to the journal and readers.

The corrected version of the figure is presented below.
