The authors regret due to an oversight during the Supporting information preparation, the original Table S4 was published with missing numerical data in the table cells. The prior data should be assigned to unit cell variation, but not shrinkage rate of unit cell. To address this, we provide the corrected table, as can be seen below. This correction ensures that all data points are accurately and clearly to the readers.

The authors would like to apologize for any inconvenience caused.

Table S4
Lattice variation of LCO-1 and LCO-2 during electrochemical cycling.

Sample	Unit cell (Å)			Shrinkage rate of unit cell (%)[#]		
	a	*c*	*V*	*a* (%)	*c* (%)	*V* (%)
LCO-1	2.816	14.063	96.532	0.7129	4.534	4.023
LCO-2	2.815	14.058	96.539	0.2635	4.211	3.785

[#](max-min)/max during the charging process.
